

Current Representative Analysis

Required at the time of registration for soil amendments derived from industrial by-products or sewage sludge.

**The following criteria must be met for each analysis:**

- Conducted within six (6) months of submission;
- Conducted by an accredited laboratory exercising good laboratory practices;
- Reported on the laboratory's letterhead;
- Performed on a dry weight basis; and
- Indicate specific analytical methods utilized.

**The following tests are required for each product:**

1. Total Kjeldahl Nitrogen (TKN)
2. Phosphorous
3. Potassium
4. Total Minerals:
  - a. Calcium
  - b. Magnesium
  - c. Sulfur
  - d. Iron
  - e. Aluminum
  - f. Manganese
  - g. Boron
5. Metals:
  - a. Cadmium
  - b. Molybdenum
  - c. Copper
  - d. Nickel
  - e. Zinc
  - f. Lead
  - g. Arsenic
  - h. Selenium
  - i. Mercury
6. Total Solids + Total Volatile Solids
7. Fats, Oils & Grease (FOG)
