

## Guidance Document for “Specific Areas Treated”

The Georgia Structural Pest Control Commission has issued this guidance document to help pest management professionals comply with the Rules of the Georgia Structural Pest Control Act in the listing of Specific Areas Treated on pesticide use records. However, this list should not be considered to be all inclusive. Any area that is treated and is not covered by this guidance list must be included on the pesticide use record. It is suggested that any pre-printed pesticide use record that lists these Specific Areas Treated also allow for space to include additional Areas that might be needed.

**SITES = SITES CHEMICAL APPLIED FOR AREA TREATED**

RESIDENTIAL		COMMERCIAL				EXTERIOR SITE KEY:	
SITE KEY:		SITE KEY:
