Food Safety: The Key Ingredient
Kids Coloring & Activity Book
The Georgia Department of Agriculture wants all kids to remember food safety as a key ingredient! There are four important steps to remember:

**Step 1: Clean.** Wash hands, counter tops, cutting boards and utensils before and after fixing food. Use warm, soapy water.
**Step 2: Cook.** Cook meats, poultry and seafood to proper temperatures. Remember to reheat leftovers properly, too! Use a food thermometer to be sure.

**Temperature Quick Guide:**
- **165°F** = All poultry, leftovers, food cooked in the microwave, stuffing, and casseroles.
- **160°F** = Hamburger, meatloaf and other ground meat.
- **145°F** = Whole muscle cuts of meat, fin fish, and fresh shell eggs broken, cooked and served immediately.
- **140°F** = Ham or other fully-cooked roasts, fruits and vegetables that are cooked.
Step 3: Separate. Keep raw and cooked foods apart to prevent cross contamination. Separate raw meat, poultry, and seafood from raw fresh fruits and vegetables.
Step 4: Chill. Always keep cold foods cold (and hot foods hot). Remember the “2 hour rule” and don’t leave perishable foods unrefrigerated for more than two hours.
GOOD CLEAN FUN
Number the steps of proper hand washing shown in the pictures below.

1: Wet your hands with clean, warm running water and apply soap.

2: Rub your hands together to make a lather and scrub them well; be sure to scrub the backs of your hands, between your fingers, and under your nails.

3: Continue rubbing your hands for at least 20 seconds. Need a timer? Hum the “Happy Birthday” song from beginning to end twice.

4: Rinse your hands well under running water.

5: Dry your hands using a clean towel or dry by air.
